Stand In My Shoes: Kids Learning About Empathy

Synopsis

When Emily asks her big sister what the word empathy means, Emily has no idea that knowing the answer will change how she looks at people. But does it really matter to others if Emily notices how they're feeling? *Stand in My Shoes* shows kids how easy it is to develop empathy toward those around them. Empathy is the ability to notice what other people feel. Empathy leads to the social skills and personal relationships which make our lives rich and beautiful, and it is something we can help our children learn. This book teaches young children the value of noticing how other people feel. We're hoping that many parents read it along with their children.

Book Information

Paperback: 30 pages

Publisher: Love and Logic Press; 1 edition (February 19, 2013)

Customer Reviews

Bob Sornson, Ph.D. is the father of four children. He has been a classroom teacher and school administrator for over 30 years, and is the founder of the Early Learning Foundation. His implementation of programs and strategies for early learning success in the Northville Public Schools has served as a model for districts around the country.

This book, rather than tell a story to illustrate empathy just launches into what empathy is. May be OK for older kids but not preschoolers

This book has been a God Send for a child I am doing therapy with! it really got through and helped open up conversations!

I liked everything about this book, and so did my 7 year old daughter. Illustrations were cute, story was clear and well written. I put it up there with that "have you filled a bucket today" book. Now my daughter knows about empathy, and likes to practice what she's learned. And when she forgets, we read it again. We need more cool books like this on the market that teach a certain mindfulness. Today it seems there are so many kids running rampant thinking its all about them... Either that, or it's the typical nature of them until taught otherwise.

Stand in My Shoes does a good job of introducing the concept of empathy to children. Most of the example situations are good, but the story starts with an older sister explaining empathy to the main character so she will give her some space...so now my 6-year-old is trying to teach OTHER people about empathy (as well as practicing it himself).

You can never learn too much about empathy and children need to be taught directly about it. This was a perfect book for my students in my second grade classroom! A must read. I will read it each year!

Great book with a beautiful message. Just wish it were an AR book

This Love and Logic book is excellent. I bought the book for my granddaughters ages 3, 6 and 8. They loved it. The 6 years old especially enjoyed the beautiful illustrations as did "Grammy!" Empathy is lacking in our world right now and this book will help our children learn to care about others in so many aspects of their every day lives! THANK YOU, Bob and Shelley for a wonderful book. I highly recommend it for all families and schools.

I am a child therapist and I use books in session to talk with children who have difficulty tolerating discussions about their own behavior. This book is a great conversation starter, introducing the concept of empathy for kids who appear to lack accountability for their actions. I have read it several times and found that the children really enjoy the colorful illustrations. Furthermore, they can relate to the examples used in the story, while learning lessons about how their behavior impacts others around them. Thanks for this book!
