Firefighter's Handbook On Wildland Firefighting: Strategy, Tactics And Safety

Synopsis

This award-winning textbook is a basic-to-intermediate study of wildland firefighting. It includes weather, fire behavior, use of aircraft, engines and bulldozers, as well as strategies and tactics. Over 40 community colleges and hundreds of fire departments, and state and federal agencies use this textbook. It is also used as a training manual in such countries as the Peoples Republic of China, Spain, and Argentina.

Customer Reviews

Chief Teie worked for the California Department of Forestry and Fire Protection for 34 years. He worked up through the ranks, from seasonal firefighter to Deputy Director for Fire Protection. In this position he was responsible for all of CDF's fire protection programs. He retired in February 1993.

I was expecting more up-to-date information, but the book is from 2005. There are still pictures of firefighters wearing ALICE web gear with yellow fire shelter cases. NWCG red books with experienced instructors will be more effective. Also, for a book this size I'd have expected more advanced information beyond the FFT2 or urban interface. Received it, flipped through it for about a minute, then returned it.

Essential resource for any firefighter to have in their library!

This book exceeded my expectations. I am an old firefighter and happy to be updated on current information.

Good shipping great book

Excellent book. Exceeded my expectations.

Arrived on time, A+

The book for basic wildland fire info.

An excellent replacement for the standard NWCG red books which generally do not have much substance. A bit pricey but well worth it to have every new wildland firefighter taking a real book home for their continuing education throughout their career.
