# National Geographic Readers: Storms!

## **Synopsis**

Storms are SCARY! But it's cool to understand what's going on when Mother Nature gets angry. Why does the wind howl? Why does it rain for days? How do rivers overflow? Thunder and lightening, monsoons, hurricanes, tornadoes... the facts and photos in this book will blow you away!

Grade Level: Preschool - 1

## **Customer Reviews**

Miriam Busch Goin is a writer who has previously worked as a teacher and a landscape architect. She is the author of National Geographic Readers: Storms.

We just love these National Geographic books. I ordered several for my three-year-old grandson, based on the things he showed an interest in. When we finish it, he always says, "again".

Great book.

These Nat Geo books are great. Both my kids (9 and 5) love non-fiction, and these books have great photos and interesting content. Who doesn't want to learn about sharks, storms, snakes, earthquakes, outer space, etc?

Storms is another great book which I added to my classroom science library. National Geographic Readers always have excellent pictures and text that is suitable for young students and readers.

There are some mistakes in the book. I have to say if we cannot give a good answer to a question, just leave them as open questions for kids. It is not wise to provide some explanations.

Came very quickly :). I purchased this book because I needed an Expository (real pictures) on storms for the pre-school age. This is perfect! Great pictures and descriptions inside. Plus there is a fun little movement exercise that can be done with the children inside the back cover.

We LOVE the Nat Geo books! My son, who is now 5, has been having us read them to him for a couple years now... And he can tell you anything you need to know about every animal, fish/sharks, reptiles, weather, etc! ;) Love that they make learning so much fun!

High interest level, yet geared at the appropriate reading level for my students. My students love National Geographic for Kids books! Excellent photographs too!
