Discovering Psychology: The Science Of Mind

Synopsis

NOTE: Access Code is NOT INCLUDED with this book Psychology is evolving into an integrative, multidisciplinary field, and this innovative book offers an opportunity to learn about it. Authors John Cacioppo and Laura Freberg highlight connections within psychology as well as between psychology and other disciplines. The writing and features are smart and engaging, and consistently illustrate the benefit of using multiple perspectives within psychology. Cacioppo and Freberg offer the best science possible, including exciting new research findings likely to expand readers' understanding of psychology as a scientific field of study. Features and images coordinate with and enhance the book, providing many additional opportunities for critical thinking and connecting ideas.

Customer Reviews

"I would say that [Discovering Psychology] is very engaging and written in a way that is highly accessible. I think its main strength is that it does a really good job of highlighting the most interesting elements of psychology, and providing a 'first taste' of what psychology is like. I would also say that it does an excellent job highlighting the ways in which psychology is relevant to people's daily lives and to the things that people spend their time thinking about on a regular basis. I would also mention that the examples and research are very current and make the text feel even more relevant as a result. ""This thorough introductory textbook highlights the application of psychology to a variety of sciences and emphasizes the need to look holistically at psychological issues. The authors selected interesting, current topics that relate to students' lives and provide

opportunities for critical thinking. This textbook covers all of the required material for an intro course but does so in an innovative way. Finally-a textbook with useful sidebars that complement and strengthen the text rather than just fill up space!""This text is modern in a way that is interesting and compelling to students, keeps their interest, and allows them to connect psychology to research and their everyday lives while also covering all of the important content."

John T. Cacioppo is the Tiffany and Margaret Blake Distinguished Service Professor and Director of the Center for Cognitive and Social Neuroscience at the University of Chicago. He is a past President of several scientific societies, including the Association for Psychological Science, the Society for Social Neuroscience, the Society for Personality and Social Psychology, and the Society for Psychophysiological Research, and a past Chair of the Psychology Section of the American Association for the Advancement of Science. Among the awards he has received are the Troland Award from the National Academy of Sciences, the Distinguished Scientific Contribution Award from the American Psychological Association, a MERIT Award from the National Institutes of Health, the Scientific Impact Award from the Society of Experimental Social Psychology, the Award for Distinguished Scientific Contributions from the Society for Psychophysiological Research, and the Campbell Award and the Theoretical Innovation Prize from the Society for Personality and Social Psychology. Dr. Cacioppo is a Member of the President's Committee on the National Medal of Science; the Chair of the Board of Behavioral, Cognitive, and Sensory Sciences at the National Research Council and a Member of the National Science Foundation Advisory Committee for the Social, Behavioral, and Economic Sciences Directorate; and a former Member of both the Council for the NIH Center for Scientific Review and the Council for the National Institute on Aging.Laura A. Freberg (Ph.D., UCLA) is Professor of Psychology at California Polytechnic State University, San Luis Obispo, where she teaches courses in Introductory Psychology, Biological Psychology, and Sensation and Perception. Dr. Freberg's teaching career began when she taught her first college course at Pasadena City College at the age of 23. To better understand the needs of the online education community, she also teaches a variety of psychology courses for Argosy University Online. Laura has received Faculty Member of the Year recognition from Cal Poly Disabilities Resource Center three times (1991, 1994, and 2009) for her work with students with disabilities. She enjoys using technology and social media in the classroom, and is a Google Glass Explorer. She serves as the President-elect of the Western Psychological Association (WPA), Content Expert Writer for Psychology for Answers.com, and as the Bylaws and Archives Committee Chair for the Society for Social Neuroscience. With John Cacioppo of the University of Chicago, she is the

co-author of two editions of **DISCOVERING PSYCHOLOGY: THE SCIENCE OF MIND** (Cengage Learning). She is also author of four editions of **DISCOVERING BEHAVIORAL NEUROSCIENCE: AN INTRODUCTION TO BIOLOGICAL PSYCHOLOGY** (Cengage Learning) and **RESEARCH METHODS** (TopHat Monocle).

The text explains Psychology, when and where it started. Who was involved with the evolution of Psychology. It also explains the science behind Psychology to where you understand how they also perform the researches and studies along with the outcome of each. Then there is nature and nature how they play a part in the cycle of Psychology. The list goes on to include behavior, sensation, consciousness, emotions, learning, memory, language, development, personality, social psychology, disorders, therapy and positive Psychology. Each chapter has a refresher at the end to allow you to answer the questions. What a good source of rehashing the information. Each chapter is very detailed to each topic, each chapter outlines the words, along with their definition on the same page. This allows you to see the word in its context, instead of going to the back of the book for the information. Well written for your enjoyment while learning at the same time.

what I needed for summer school. like the fact I can rent it for such a deal

This was a helpful well written book. I learned a lot.

This textbook was exactly what I needed for school! So glad this is available to rent on . And the price was **PERFECT!**

I thought it was well written. I had to read it for school and that is not always enjoyable, but I loved being able to have it on my Ipad.

There are summaries of all areas, and I am still using to help me out in other psychology classes. Definitely I recommend it.

Got me through my psychology class and was actually pretty interesting! recommend.

Awesome it came wrapped and without damage to the package or the textbook
