David H. Barlow is an internationally recognized expert and leader in clinical psychology, having pioneered many treatments and investigations in anxiety and mood disorders. Currently Professor Emeritus of Psychology and Psychiatry at Boston University, Dr. Barlow is also founder and Director Emeritus of the Center for Anxiety and Related Disorders, one of the largest research clinics of its kind in the world. Previously, he was Distinguished Professor at State University of New York at Albany. From 1975 to 1979, he was Professor of Psychiatry and Psychology at Brown University, where he also founded the clinical psychology internship program. From 1969 to 1975, he was Professor of Psychiatry at the University of Mississippi Medical Center, where he founded the Medical School psychology residency program. Dr. Barlow received his B.A. from the University of Notre Dame, his M.A. from Boston College, and his Ph.D. from the University of Vermont. He is the recipient of a Lifetime Achievement award from the American Psychological Association as well as the James McKeen Cattell Fellow Award from the Association for Psychological Science, which

honors individuals for their lifetime of significant intellectual achievements in applied psychological research. V. Mark Durand is known worldwide as an authority in the area of autism spectrum disorders. He is a Professor of Psychology at the University of South Florida St. Petersburg, where he was the founding Dean of Arts and Sciences and Vice Chancellor for Academic Affairs. Dr. Durand is a fellow of the American Psychological Association and has received over \$4 million in federal funding to study the behavior problems in children with disabilities. Previously he served in a variety of leadership positions at the University at Albany, including founder of the Center for Autism and Related Disabilities. He received his B.A., M.A., and Ph.D. (all in psychology) at the State University of New York (SUNY) Stony Brook. Dr. Durand received the University Award for Excellence in Teaching at SUNY Albany in 1991, and the Chancellor's Award for Excellence in Research and Creative Scholarship at the University of South Florida St. Petersburg in 2007. Currently a member of the Professional Advisory Board for the Autism Society of America, he is the co-editor of the Journal of Positive Behavior Interventions and has written 10 books as well as over 100 publications on functional communication, educational programming, and behavior therapy. Dr. Durand developed a unique treatment for severe behavior problems that is used worldwide. Most recently he developed an innovative approach (Optimistic Parenting) to help families work with their challenging children. He was named a 2014 Princeton Lecture Series Fellow and received the 2015 Jacobson Award for Critical Thinking from the American Psychological Association for his body of work in the field of autism spectrum disorder.

I will say this, "Abnormal Psychology: An Integrated Approach" is certainly one of those textbooks I'll hold on to and read again after this semester is over. The information is easy to imbibe and the presentation, frankly, makes the book easy to read. I've found myself for the first time in a long time ahead of the class readings, and I got the book late!

This book was for my abnormal psychology class at University. For a current university class, this is one book that you can't get away with using an old Edition of, as it matches the DSM which is updated occasionally and recently (although I must say and that old editions of the DSM are very interesting in order to compare the changes and transformations in diagnosis and the way society looks at mental issues). This book goes with the most current DSM update. I learned so much from this book, it is filled with interesting case stories and all sorts of facts and tidbits. It reads in an interesting and easy way. This abnormal psychology class was one of my very favorite college classes. The only problem with this book (as tends to happen with large college books filled with a lot

of information) is it can tend to be a little heavy and cumbersome. I do not think that is a fault of the book, the book itself is absolutely wonderful, thats just what happens in college you have to carry around heavy books. I will keep and cherish it for many years! So no, you cannot buy my used copy ;) I also have to say that you do not need to be enrolled in a college psychology class in order to enjoy this book , this book would benefit anyone who is interested in the information.

Required reading material for class. Excellent resource book.

Really enjoyed exploring the many facets of abnormal psychology. Loved the embedded stories for actual people. Bought this for an abnormal psych course. I am biased towards leaving a good review, as this was one of my favorite college courses.

I ordered this book for my Psychopathologies class, and I absolutely love it! Each type of disorder is broken down into chapters, for example, one chapter covers all the Somatoform and Dissociative Disorders. Then, each chapter is broken down into the individual disorders. There are case studies, diagnostic criteria per the DSM-IV-TR, colored pictures, and current research regarding each of the disorders. The book also covers, briefly, the treatment process for these disorders. The treatment section focuses more on therapy rather than medications, but it does state what type of medications are generally prescribed. There are visual aids as well to help those who can't learn by straight reading. I think this is a valuable book and worth the money I spent on it. I will definitely be keeping this book!

Very informative, if a bit dry. I'm a Psychology major, but there were even parts that were difficult for me to find engaging and interesting. Due to the cost difference, I would definitely recommend renting the books instead of buying them...unless you needed them for future reference.

great rental price and quick ship!

A good overview of the major psychological disorders, with interesting insight into each. The DSM-5 "boxes" that articulate the specific criteria for each disorder was helpful, but I learned is actually a bit different and often abbreviated from the actual DSM-5 text. It didn't cause any problems for me in the course though.
