Construction Law For Managers, Architects, And Engineers

Synopsis

The construction industry now has a clear, targeted resource for learning pertinent legal principles. Traditional books focus on general legal principles or general construction practices, while this book focuses on that critical place where the law and construction practices intersect. From labor law to contracts, property law to insurance, *Construction Law for Managers, Architects, and Engineers* uses real-world examples and clear, straightforward business language to transform complex legal jargon into relevant, applicable legal principles and strategies. This book serves as an ideal reference for managers, architects, engineers, construction executives, as well as a useful learning tool for students seeking the knowledge to succeed in these important fields.

Book Information

Hardcover: 528 pages

Publisher: Delmar Cengage Learning; 1 edition (December 12, 2007)

Nancy J. White, J.D., is an Associate Professor in the Department of Finance and Law at Central Michigan University. She has been teaching the basics of construction law for over 10 years.

An excellent book. I received this book in new condition.

I was expecting a textbook focus and construction law full of engineering guide details. I would not recommend to a friend

This book is very iformational it contains good examples that relate to the industry. I would recommed it to a first law book in construction.
