Plants For Natural Gardens: Southwestern Native & Adaptive Trees, Shrubs, Wildflowers & Grasses

Synopsis

This companion book to *Natural by Design: Beauty and Balance in Southwest Gardens* concentrates on over two hundred plants, individually photographed and profiled. The key to any successful garden is knowing the plants, the conditions that nurture them, and the care that must be taken in their propagation, cultivation, transplanting, and pruning. Knowing the native and adaptive plants of the region and how best to use them in the landscape will enable the gardener to create gardens of self-sustaining beauty.

Judith Phillips has worked in ornamental horticulture since 1970 as a professional plant grower and landscape designer. She is the author of several books including *Southwestern Landscaping with Native Plants* and *Natural by Design: Beauty and Balance in Southwest Gardens*.

Wonderful, informative book, destined for someone who will shortly be gardening in the

Southwest. Makes creating a garden under difficult, arid conditions less daunting.

Another fabulous book by Judith Phillips. I've been lucky enough to have Judith do a landscape design for two of my houses, and she is amazing.

A great starting place for planning a garden in this difficult to cultivate place. Emphasis on zones in one's yard and more responsible water use.

Living in Las Vegas, my water conscious conversion from grass to drought tolerant plants and landscape had to be well thought out. It also had to be an efficient, long lasting, and effective action. This book helped in all of those areas.

Very helpful when planning and landscaping for high plains desert gardens. Informative.

great resource for a master gardener
