Fundamentals Of Weed Science, Fourth Edition

Synopsis

This book addresses herbicides and their use as an important aspect of modern weed management and strives to place them in an ecological framework. Many weed scientists believe agriculture is a continuing struggle with weeds--without good weed control, good and profitable agriculture is impossible. Each agricultural discipline sees itself as central to agriculture's success and continued progress, and weed science is no exception. While not denying the importance of weed management to successful agriculture, this book places it in a larger ecological context. The roles of culture, economics, and politics in weed management are also discussed, enabling scientists and students to understand the larger effects on society. Information on New herbicides included, along with the old herbicides that are important for understanding the historyNew section on weed resistance to herbicides and genetic engineeringNew information on invasive plantsExpanded chapters on Biological Control, Pesticide Legislation and Regulation, Weed Management Systems, and moreInstructor resources can be found at <http://textbooks.elsevier.com/web/Login.aspx>, and it is password protected. Robert L. Zimdahl is a Professor of Weed Science at Colorado State University. He received his Ph.D. in Agronomy from Oregon State University. Among his many honors and awards, Dr. Zimdahl

was elected a Fellow of the Weed Science Society of America in 1986 and currently serves as editor of that society's journal, Weed Science. He has been a member of several international task forces and has authored a number of books and articles on the subject of weed science.

Very useful for weed scientists.

So far book is very biblical, and conservative in terms of application of herbicides. Not to mention there are many biblical references on every page, deeming to be a bit excessive.
