The Horizon: Arisen, Book 6

Synopsis

The operators face their demons Mission complete, Alpha team enjoys their first chance to breathe and tend to their humanity. But the darkness leaves them alone with their demons - and those who have found love may yet learn that it is fatally incompatible with duty.... The carrier faces unimagined threats The JFK steams for Africa despite rumors of lone Zulus still wandering belowdecks. But when Dr. Park and Sarah Cameron are trapped in an isolated compartment, they learn that one Zulu can kill you just as dead as ten million - while up on the flight deck, a lone assassin inflicts horrific damage on the hopes for a cure.... London preps for humanity's last stand Amarie and the Tunnelers find themselves resettled in a chillingly postapocalyptic London, where mini outbreaks are hushed up, and the displaced will cut your throat just to take your shoes - all as history's largest fixed fortification goes up along the M25 ring road around the capital.... The Royal Marines drop into hell Lieutenant Jameson and his battered Royal Marines launch, by air, to retrieve a rare biomedical device, which is indispensable to developing a vaccine - but that lies buried at the center of a perilously rotting structure in a city of millions (all dead). When the walls come down and the horde descends, Jameson may be the last man standing - and his only chance of survival lies with a lone Apache pilot who refuses to obey her orders to abandon him.... Hope survives - but the story of humanity is not yet written.

Customer Reviews

After book five and the battle of the aircraft carrier, I thought this series could not get any better, how

wrong I was. It starts off slow, each member of the A team reminiscing what had happened and how they were dealing with it, but wouldn't you just know the Arisen authors start to speed up and here comes more bum puckering, how they come up with some of these ideas I will never know. If this could ever be made into a movie series it would knock the socks WWZ and Walking Dead easy. Bought it on Tuesday evening and finished it by Wednesday evening and Wednesday was a working day! Thank you Michael Stephen Fuchs and Glynn James for another riveting story.

Just as with the first five books in this series, this one was great. Fuchs writes with such skill that the characters leap off the page and right into your heart. Each character in this series has been constructed by a master. I tend to put off reading the next in the series after the completion of the one before solely because I know that I will be gripped from page one not able to lay it down until the last word on the last page is read. So I pick a day, and anxiously await for it so I can sit and read it as a whole. This is not easy because these characters have become a part of me. I am constantly wondering what will come next for them. Sometimes I make it to my planned day of reading and most times I don't which causes an all nighter reading experience. But for this series, it's worth it. If you have not read this series yet, it's a must for all Zombie Apocalypse fanatics. But, be sure to start from the beginning with book one. You will not regret it. I have read more books of this genre than I can possibly count but this series is my favorite and on that I will re-read many times.

Finally Alpha and the other military people on the super carrier are out of danger - or are they? - because nothing is ever easy for these men and women. But now we get to see more of them, how they're all coping with what happened, signs of PTSD. But still they push on, never backing down. And we met again with the military groups on the ground in Britain. It's like meeting old comrades in different scenarios, mostly dangerous. The beginning was a nice change of pace, but never fear, it picks up again!

I have just finished reading Arisen 1-8. I have enjoyed all these books and love the characters. I read the first book in a compilation and had to get all the rest one after the other. The characters are so well written and you really care about them right away. Alpha Group is totally Awesome !! It's hard to say who I liked best. Juice, Handon, Ali, Homer, and Pred !!! You become so involved with these characters that when something happens to one of them you feel for them. You learn a great deal about Special Ops, different weapons, the heart of our Country's and England's Best of the Best of the Best to help us survive the end of the world. They are well trained people who put it on the line

in conditions most of us would just give up and die in. I can't wait for book number 9 to come out and will get the prequels while I'm waiting. I have found two new author's that I like and will search out other books by them, and look forward to reading them. I don't like to tell about the books I read because it spoils it for people who have yet to read them. I hope everyone gets these books. They are really good stories, really good characters except for a really bad guy living alone way far away - he will be back.....Oh No !!!!! I hope everyone enjoys these books as much as I have they rock it in the book world !!! These books have everything you look for in a good book. Kind people, bad people, in-charge people, scared people, hero's.....on and on must read these books.....

A MUST READ in a Great Zombie Apocalypse Series! One of the best in this genre, the story continues to follow military Special Forces as they try to stop the Zombie Apocalypse. Please check "Yes" if you have found this review helpful. I rely upon others' reviews to make an informed decision anytime I make a purchase, so it is my intention to help others do the same. I welcome any questions or feedback.

So I am on book nine and have failed to review the rest of the books. I don't want to spoil anything so I am leaving this: my sweet goodness. This book and all of them in the series are just utterly crazed breath taking amazing situations that are just glorious stress inducing to the reader. My heart rate is up. Every thing that can go wrong does and it is all pretty believable and you both hate the authors and love them. The characters are all really interesting and deep. And the action is fantastic. The details are spot on. And did I mention I have to stop to just breathe far too many times. I love it!!! Fast paced, non stop heart wrenching, zombie killing amazingness!!! Buy them all now and let your heart start pumping!!!

An epic completion of the primary story. The plot was exciting with the events coming fast and impossibly dangerous. The size of the battle for all humanity was huge. The characters fully developed through the series also smoothly assimilate into this book. These characters are like good friends (I know it's a cliché) and I looked forward toward the impending events to see what happens next. The story line leaves you breathless. Predicaments, one after another leave the successful outcome in real doubt. James and Fuchs are powerful writers who you'll enjoy
