Effective Leadership In Adventure Programming - 2nd Edition

Synopsis

Effective Leadership in Adventure Programming, Second Edition, will help students -understand the key elements of effective leadership in both theory and practice,-learn important leadership skills through real-world applications, and-explore new trends in adventure programming. Effective Leadership in Adventure Programming, Second Edition, explains how the key elements of leadership work in theory and practice, and it helps train the next generation of adventure leadersâtraining that is paramount to developing the field. Through this text, readers will enhance their understanding of this rapidly growing profession. Renowned authors Simon Priest and Michael Gass provide in-depth descriptions and real-world applications of the technical, organizational, instructional, and facilitative skills that are essential to adventure leadership. The authors also identify what they call the metaskills that superior leaders use to combine the other essential skills seamlessly and effectively. The authors provide fully updated content and references, including new information on legal liability, risk management skills, and future research trends in adventure programming. They also do the following:-Examine the historical and philosophical foundations of adventure programming-Provide safety and environmental guidelines that leaders should follow-Describe the organizational, instructional, and facilitation skills that outdoor adventure leaders should possess-Identify the importance of flexible leadership style, problem-solving and decision-making skills, experience-based judgment, effective communication, and ethical behaviorsThe first edition of this book set new levels of excellence in leadership in adventure programming. The second edition preserves the comprehensive and classic nature of the original while raising the standard for the field in the 21st century. The authorsâ skillful approach to integrating all aspects of effective outdoor adventure leadership makes this book an ideal text for adventure leadership and programming courses and an outstanding reference for practicing professionals.

Simon Priest, PhD, is president and chief executive officer of virtualTEAMWORKS.com, which specializes in experiential learning on the Internet. He is also a retired full professor from Brock University in Canada and the executive director of the Corporate Adventure Training Institute, a research center of excellence. He was an interim director of Canadian Tire's corporate university. A member of the Association for Experiential Education (AEE) since 1983, he chaired their research task force, safety practices task force, and student research grants committee while also contributing on the journal editorial board, scholarship committee, conference steering groups, and journal editorships. Dr. Priest's contributions to the field of adventure programming have had an international impact. He has been a scholar in residence and has been awarded visiting fellowships in Australia, New Zealand, Canada, the United States, England, and several other European nations. He has studied and taught about outdoor leadership in more than 40 countries around the world. Dr. Priest has researched and written extensively on the topic of adventure programming. He has authored or edited several books and book chapters, and his articles have appeared in publications such as the Journal of Adventure Education and Outdoor Leadership, the Journal of Experiential Education, Journal of Leisure Research, Leisure Sciences, Leisure Studies, and the Journal of Physical Education, Recreation and Dance. Dr. Priest received his doctorate in outdoor recreation from the University of Oregon in 1986. Michael Gass, PhD, is a full professor and chair of the department of kinesiology and member of the award-winning outdoor education program at the University of New Hampshire (UNH). This accredited program is recognized as one of the best undergraduate and graduate training programs in the world, and its students are some of the finest emerging professionals in the field of adventure programming. Dr. Gass has helped to produce numerous pivotal books for the field, including Book of Metaphors: Volume II, Adventure Therapy: Therapeutic Applications of Adventure Programming, and Program Accreditation Standards for Adventure Programs with Jed Williamson. He has conducted numerous international workshops and trainings, and his writing has appeared in professional journals around the world. He currently directs several evidence-based research projects for the American Youth Foundation and Project Adventure to validate and promote best practices in the field of adventure programming. Dr.

Gass served as president of the Association for Experiential Education (AEE) in 1990 and was the chair of AEE's Therapeutic Adventure Professional Group in 1992-93 and 1995-96. He also was the chair of the American Alliance for Health, Physical Education, Recreation and Dance's Council for Outdoor Education in 1994. Currently he is the editor of the Journal for Therapeutic Schools and Programs and serves on the review board for the Journal of Experiential Education. He also served for 10 years on AEE's Program Accreditation Council. Dr. Gass received his PhD in experiential education from the University of Colorado at Boulder and completed postdoctoral studies in marriage and family therapy. When not with his family, he can be found climbing or wilderness running.

This was a textbook for an outdoor recreation class in my undergrad. The book was good enough physical and soft skills instruction that I still reference it today. It is an excellent book for gaining outdoor leadership knowledge, and is great for reviewing skills. I'm now an High Adventure program director (take folks kayaking, climbing, skydiving, etc) and I can attribute a lot of my skills to the course where this book was used. It had great sections on planning excursions, dealing with new outdoor adventurers, environmental protection and conflict resolution. This book addressed exactly what should be in an outdoor leader's guide. I highly recommend it for anyone going into outdoor leadership, especially if doing it professionally. And honestly, I wish it was mandatory reading for scouts and especially scout leaders when I was in the Boy Scouts, and definitely today.

This book is an incredible resource to develop leadership skills for experiential programming.

If your buying this book for Ben's class, don't cuz you never use it lsc

Excellent resource for any outdoor educator.

My oldest daughter - in college - seems very well pleased with this selection... like the professor gave her a choice, right?

If you either are an adventure activities leader, or in training to be one Effective Leadership in Adventure Programming is an invaluable book to have at hand. If you are already one it is useful for doing self reviews on your current performances, as it at the end of each of the 22 chapters it has a review box called 'effective adventure leaders should', a box containing a brief review of all the main

points of that chapter which directly relate to the practical aspects of what leaders should be doing to ensure maximum safety within the group, while allowing the group to get the most out of the adventure experience they have been taken on. - I can almost guarantee that every leader will pick up several tips from these sections no matter how experienced they are within the adventure leadership field. If you are training to be an adventure leader, then each of the chapters guide you through different situations, highlighting not only the actions of the coach but in the ways the clients will react from these actions in different situations depending on their previous experience, motivation, and fears. Each chapter starts with a given realistic situation which directly relates to the theme of the chapter, which is then used to explore the actions of the group and the leader in the given situation and analysis in small detail, the quality of the planning, leadership, and group advancement. Due to the nature of the subject it can often feel like heavy reading (which it is), but it does have everything you could ever need to know within its pages, and so makes it the best book on the subject I know of, and being on an B.A. Adventure Education course, I've read quite a few. Also highly recommended by me to compliment it is the book Adventure Programming by John C. Miles(Editor), Simon Priest(Editor). Hardcover (December 1999)

I got this book because it was required for two of my classes and thought it was going to be just another text book but it turns out to be interesting, well organized, and full of useful information. It is also very relevant to anyone who likes going on adventures. All in all it's a book worth getting.
