Pathology Of Neoplasia And Preneoplasia In Rodents

Synopsis

This is the second volume of a colour atlas presenting a comprehensive summary of the histopathology and cytopathology of preneoplastic and neoplastic lesions in laboratory rodents. The first volume covered lesions of the mammary gland, liver, pancreas, kidney, urinary bladder, central nervous system, bone, haematopoietic and lymphatic system. This book contains chapters on skin, salivary gland, lung, oesophagus, stomach, intestines, pituitary gland, thyroid gland, adrenal gland, male and female genital tract and soft-tissue tumours. Each chapter is introduced by a short text explaining the principles and standards of the classification of preneoplasia and neoplasia in the rodent tissues described. Examples of lesions are presented by a large number of microscopic colour illustrations providing a sound basis for correct diagnosis, which should be useful for the evaluation of many animal experiments, including carcinogenesis bio-assays.

Book Information

Paperback: 216 pages

Publisher: Schattauer GmbH (December 1997)

Language: German

ISBN-10: 3794516249

ISBN-13: 978-3794516247

Package Dimensions: 11.6 x 8.4 x 0.7 inches

Shipping Weight: 2.6 pounds
