This is the first book that I have read about Air Fryer, and I find this very interesting. It has given the promise of eating all the fried foods we love but without putting your health at risk. And I think this offer is the best. It has given so many recipes to do, those that will make eating really enjoyable and healthy too. And what is even more amazing is that we can save money since there is no need to buy for some cooking oil. What could be more awesome than this? So, if you have an Air Fryer, this cookbook is the best partner for it.

I love this cookbook! It contains a large variety of recipes. Recipes are delicious and really quick to prepare. Most of the recipes will take less than hour to prepare. They are simple enough to make, but delicious enough to impress your friends and family. All recipes in this book are saved with simpler ingredients with easy cooking directions. Your family followers will absolutely request you to prepare these dishes again and again.

I've read other books and they give good examples, but this one goes far beyond that. This book

introduces Air Fryer recipes for a clean and healthy living. I found their recipes and diet plans very delicious and helpful indeed. It is full and well structured guide. And the best part is that all the recipes in this book are extremely simple and quick to make.

Eating healthy foods is always a must. It's just that not all are knowledgeable enough about what are those that are healthy and those that are not when consumed too much. This book is absolutely a wonderful guide to be able to eat healthy foods, especially fried ones. The book clearly explained what air fryer is and how is it done, and what are the benefits of it. One's favorite foods can have its healthier version and this book absolutely has a lot to offer. I like it.
