Customer Reviews

markings on spine and edges of book

This has been a wonderful asset in school. The school gave us the book, but did not think we needed the workbook.The teacher has been photocopying the workbook as we review each chapter for us to practice with.Now I can do my own instead of waiting for the copies.I recommend this to all students taking the class, in any school.

I appreciate how much fast it came and little bit some home work done in there but it is useful for me compare my home work with somebody home work. Any way, this book came fast and very helpful.thanks

very helpful

This book did not have any reviews when I purchased it -- last time I'll buy one like that. The description (as I recall) was not clear in stating that this book is useless unless you have the actual textbook. I prefer the kind of workbooks that double as a textbook and workbook and that is what I

thought I was buying. This book can be used only if you have the textbook.
