MCAT Chemistry And Physics: Strategy And Practice: Timed Practice For The Revised MCAT

Synopsis

Revised for 2016! All of Next Step's books have gotten a full review and update. More Free Stuff!: We are now offering a free full-length exam in addition to the free diagnostic test described below. See the book insert for instructions on how to register for this free additional full length exam. Get the most realistic practice available for the MCAT's Chemical and Physical Foundations of Biological Systems section. Next Step's Strategy and Practice books give you a focused review of several different approaches to MCAT problems, and then offer the single most important resource an MCAT student needs: full timed section practice. Test your skills by completing practice sections and then build upon them with the most thorough explanations available in any MCAT prep book. Unlike most other books (that simply give you an answer key and maybe a short description of the right answer), all of Next Step's Strategy and Practice books show you how to do a thorough breakdown of the passage itself and then follow that up with a careful analysis of the question and every answer choice. Those who purchase a Next Step book also get free access to our online MCAT diagnostic test. See the URL at the front of the book for instructions on how to register. Finally, you can always check for free updates and free upgrades to our books here: <http://nextstestprep.com/mcat-materials-change-log/>

Book Information

Paperback: 442 pages

Publisher: CreateSpace Independent Publishing Platform (January 4, 2015)

Language: English

ISBN-10: 1505959853

ISBN-13: 978-1505959857

Product Dimensions: 8.5 x 1 x 11 inches

Shipping Weight: 3 pounds (View shipping rates and policies)

Average Customer Review: 4.1 out of 5 stars 11 customer reviews

Customer Reviews

Bryan Schnedeker is Next Step's National Academic Director. He has been teaching and tutoring for

over a decade, and personally scored a 44 on the old MCAT and a 525 on the new one. He has helped thousands of students succeed on their tests, and specializes in working with students looking to achieve elite scores on their tests. To get more information about tutoring with Bryan, contact Next Step at 888-530-NEXT. Anthony Lafond is Next Step's National Content Director. He has taught the MCAT for over 10 years and scored a 42 on the previous MCAT. He earned his MD and PhD degrees from UMDNJ-NJMS.

Chemistry and Physics were the subjects that I know I will need to work on the most during my studies, so I decided to purchase this for additional questions. Surprisingly on my practice MCAT, I scored the highest on the Chem and Physics section! Surprise to me! But definitely can be attributed to the tough problems given in this book. Highly recommend for those weak in this section

This book has helped me with really challenging myself and with practice problems in real time. It even has a breakdown score. I really like this better than Kaplan. I will be getting the Bio and CARS version of this soon!

not really helpful for the real MCAT.

Not the most helpful for the new MCAT

In addition to reviewing chem/physics content I have been using this book to test my speed and ability to work through problems. The full length sections in this book have been a great way to see just how quickly I am able apply what I have learned. Definitely start with the content review books then move into doing more realistic practice. There are sooooo many questions to go through in this book, it has definitely been a great supplement to what I got with the prep course I am taking. My friends and study group members have also really liked this resource as well. This book is definitely a great addition to any MCAT-preppers tool box.

I really like how this book forces me to study actively, rather than just passive reading. It has helped me build an excellent study guide.

Same thing different topic

Now that I've had the book for a few months, I can evaluate it. For first-time MCAT students who need to seriously practice their chemistry or repeat testers who need more practice for the new MCAT, this book is incredibly helpful. The passages are written in a style that really mimics that of the new MCAT material I have purchased from the aamc. The explanations are logical, clear, understandable and they never make me scratch my head. In addition, many excellent figures are included in most of the passages so I get to practice my data interpretation and statistics analysis that the AAMC seems to be after. With numerous strategies and 45+ practice passages covering all Chem/Physics topics the aamc says can show up on the MCAT, this book is a must-buy for those who need physics/chem MCAT practice.
